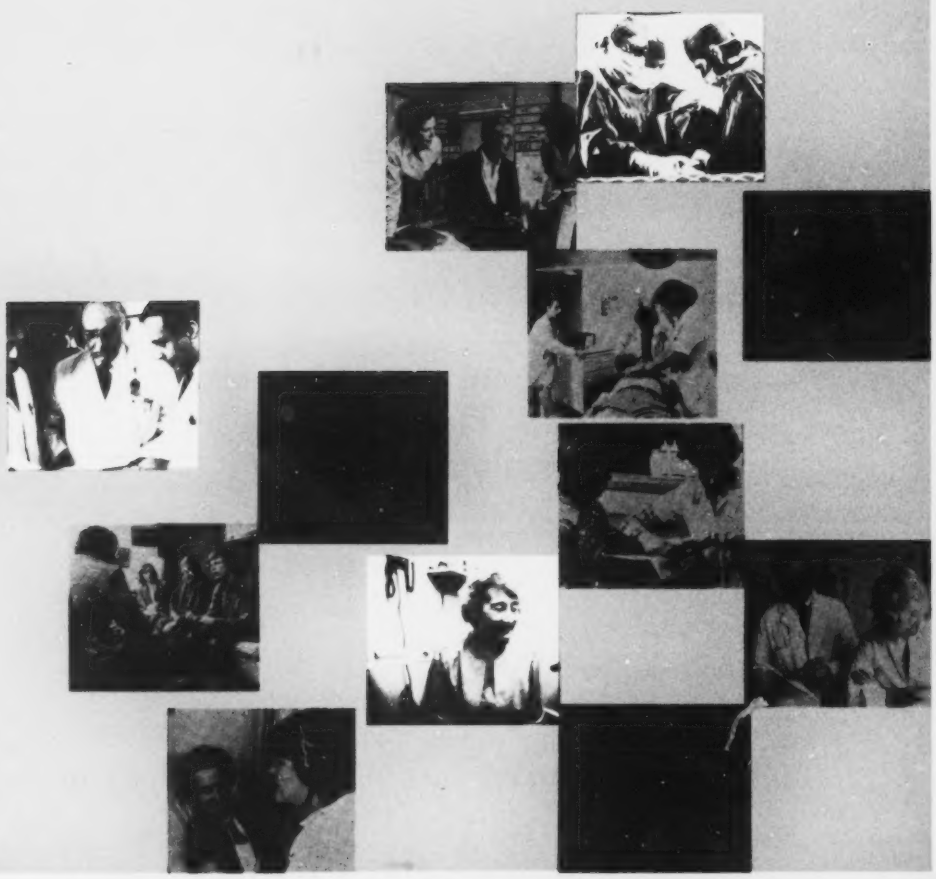
1986 HOSPITAL DAILY SERVICE CHARGES

A State-by-State Guide



EQUICOR

EQUITABLE HCA CORPORATION

October 28, 1986

It gives me great pleasure to present our 14th Annual State-by-State Survey of Hospital Daily Service Charges. The 1986 edition is especially noteworthy because it is the first Hospital Daily Service Charges Report published by EQUICOR, Equitable HCA Corporation, our new company combining Equitable Group & Health Insurance Company and the Health Plans Division of Hospital Corporation of America.

As in previous years, the 1986 Hospital Daily Service Charges Report contains important information on the current charges of hospitals nationwide. In addition to our traditional listings, this issue includes a new entry, The Average Charge per Stay.

EQUICOR is committed to continuing the tradition of producing the Hospital Daily Service Charges Survey as a public service each year. And, as always, we will be happy to answer questions or to provide complimentary copies on request. Please direct questions or requests to EQUICOR, Group Marketing Department, 195 Broadway, New York, NY 10007, (212) 618-4994.

We hope you find this information useful.

Sincerely,

Gilbert M. Reich
Chairman & CEO
EQUICOR

Introduction to 1986 Hospital Daily Service Charges Brochure

The figures in this study summarize the data provided by 2,362 hospitals (48.8% of the hospitals surveyed) responding to questionnaires distributed during the second quarter of 1986. Hospital Daily Service Charges are defined as room and board charges plus ancillary charges (inpatient only). Charges are not separated out by room category.

The following controls were applied to the selection of hospitals in the survey:

1. Hospitals were chosen from a listing provided by an outside marketing firm. They were selected to provide a geographical cross section of the United States (1,989 cities are surveyed in this report) including a reasonable sampling of hospitals in all metropolitan areas.
2. All hospitals are classified as having primarily short-term stays — over 50% of admitted patients stay less than 30 days.
3. Only hospitals classified as "general medical and surgical" were included.
4. All federal government hospitals (e.g. Navy, Veterans Administration) were excluded from the survey. Included in the survey were all non-federal government hospitals, such as state, city or county hospitals, private non-profit and for-profit hospitals.
5. Surveyed hospitals were requested to exclude geriatric and orthopedic beds, beds reserved for maternity, nursery, pre- or post-natal and infant care; and beds reserved for psychiatric, alcoholic recovery, rehabilitation and isolation purposes.

Average room and board charges, ancillary charges and average length of stay have been weighted by the total number of patient days. These averages have been calculated on a city, state and national basis.

For example:

To find a city's average room and board charge, the following steps were calculated:

1. The Average Room and Board Charge supplied by a hospital was multiplied by the total patient days reported for that hospital, thereby arriving at the Hospital Total Room and Board Charge for every hospital in a city.
2. Hospital Total Room and Board charges for all hospitals in a city were added, arriving at a City Total Room and Board Charge.
3. All patient days for all hospitals in a city were combined, producing the City Total Patient Days.
4. City Total Room and Board charges were divided by City Total Patient Days, giving us the City Average Room and Board Charge.

To calculate the Average Charge Per Stay, the Average Charge Per Day was multiplied by the Average Length of Stay.

All hospital charges reported were rounded to the nearest dollar: $125.49 becomes $125.00 and $125.65 becomes $126.00.

Note: Any raw comparison of hospital service charges from one part of the country to another may be misleading, since some regional variations in the charging base can exist. This study makes no attempt to judge the cost-effectiveness or quality of care of any hospital, or of hospital care in any city or state.

Non-Respondent Report

Non-Respondent Report: This report compares, on a state-by-state basis, the number of hospitals that responded to the survey with the number of hospitals that did not respond.

State	Number of Hospitals Surveyed	Number of Hospitals Responded	Percent of Hospitals Responded

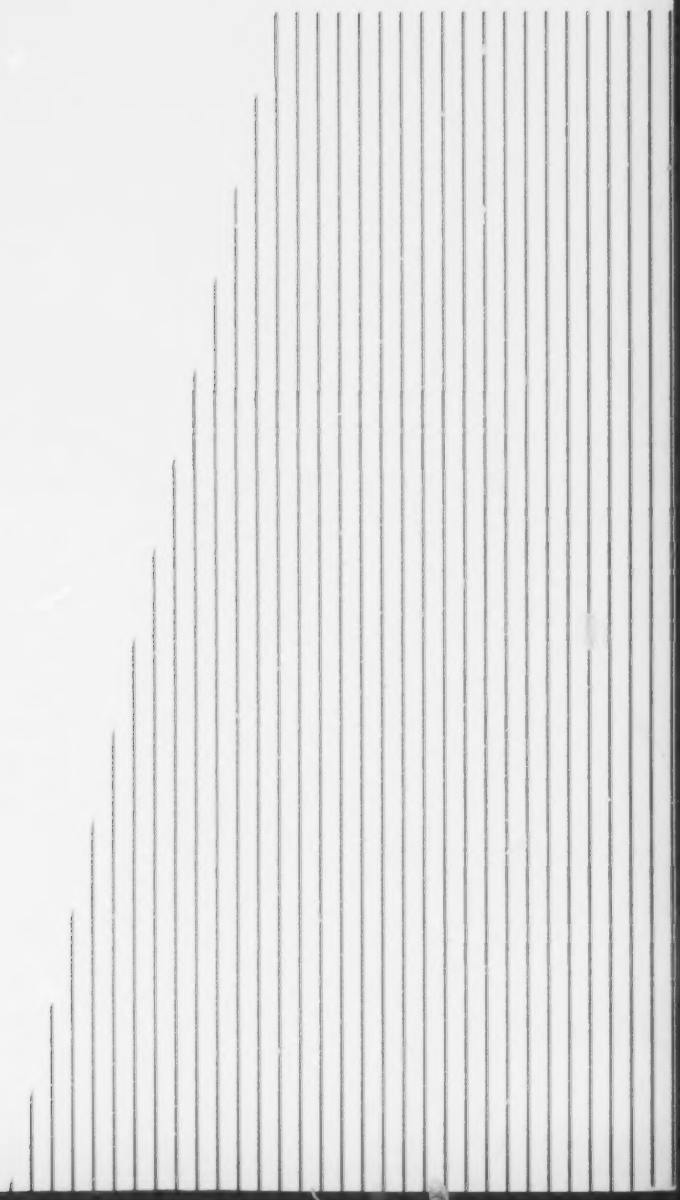
EQUITABLE HCA CORPORATION

1987 Hospital Daily Service Charges

An Annual Report from EQUICOR



EQUICOR

EQUITABLE HCA CORPORATION

December 14, 1987

It gives me great pleasure to present the 1987 survey of Hospital Daily Service Charges, an Annual Report from EQUICOR. This is the 15th edition of our state-by-state survey of current charges at hospitals nationwide, and it has been expanded and improved.

In this year's report the data is organized into Metropolitan Statistical Areas (MSA). This new format helps assure the confidentiality of responding hospitals, while allowing the data to be presented in more meaningful ways.

In addition to our traditional listings, the 1987 survey includes two new data categories: Average Patient Days Per Bed and Percent Change Between 1986 and 1987 Data. You'll also find additional "20/20 Reports" showing the 20 highest and 20 lowest Average Patient Days Per Bed and Average Lengths of Stay by MSA. All of the "20/20 Reports" are presented graphically for greater clarity.

Finally, the 1987 Hospital Daily Service Charges Report contains a brief "Survey Highlights" section to help you more quickly review the results.

EQUICOR is proud to continue our tradition of producing the Hospital Daily Service Charges Report each year, as a public service. As always, we will be happy to answer questions or provide complimentary copies on request. Please direct questions or requests to EQUICOR, National Marketing Department, P.O. Box 1115, Nashville, TN 37202, or 615-340-3246.

We hope this information is helpful in your work.

Sincerely,

William T. Hjorth

William T. Hjorth
President and COO

Introduction

Participating Hospitals

The 1987 Hospital Daily Service Charges report from EQUICOR summarizes the data provided by 1,863 hospitals (33% of the hospitals surveyed) who responded to questionnaires distributed during the second quarter of 1987. Hospitals were asked to provide data for fiscal year 1986.

These guidelines were followed in selecting hospitals for the survey:

- All hospitals listed by the American Hospital Association as "general medical and surgical" received the 1987 survey questionnaire and were asked to participate. This includes all non-federal government hospitals, such as state, city or county hospitals, private non-profit and for-profit hospitals.

- All federal government hospitals (e.g., Navy, Veterans Administration) were excluded from the survey.

Hospital Daily Service Charges

Hospital Daily Service Charges are defined as inpatient room and board charges plus ancillary charges. Charges are not broken down by room category and exclude the following data:

- Geriatric, psychiatric, rehabilitation and extended care.
- Pre- or post-natal, infant and routine nursery care.

Metropolitan Statistical Areas

Data in the 1987 Hospital Daily Service Charges report are shown by Metropolitan Statistical Area (MSA). MSAs are defined by Federal agencies under the Office of Management and Budget and represent geographic areas with a large population. There are two different types of MSAs:

- An individual city of at least 50,000 people, or a

- Metropolitan area of one or more counties having a total population of at least 100,000, with economic and social characteristics in common.

MSAs can cross state lines and where this occurs, the data are reported under both states. However, State Totals only include data for hospitals actually located within state boundaries.

Data received from hospitals in counties that do not fall in a Metropolitan Statistical Area are reported under the "Non-MSA Counties" entry for each state.

If none of the hospitals in a particular MSA (or non-MSA) responded to the 1987 survey, an asterisk appears in each of its measurement columns. Asterisks also appear in the "Percent Change 1986-1987" column where an MSA did not have 1986 data available for comparison.

An Index of Metropolitan Statistical Areas by State and County is provided at the back of this report to help you determine the correct MSA name for your county.

Calculating Averages

Averages have been calculated on an MSA, state and national basis. All average measurements have been weighted by the total number of patient days.

For example, to compute an MSA's average room and board charge, the following calculations were made:

1. The Average Room and Board Charge supplied by each hospital was multiplied by the total patient days reported for that hospital, thereby arriving at the hospital's Total Room and Board Charge.

2. Total Room and Board Charges for all hospitals in an MSA were added together, arriving at an MSA Total Room and Board Charge.

3. Total Patient Days for all hospitals in an MSA were combined, producing the MSA Total Patient Days.

4. MSA Total Room and Board Charges were divided by MSA Total Patient Days, resulting in the MSA Average Room and Board Charge.

All hospital charges reported are rounded to the nearest dollar: $125.01 to $125.49 becomes $125.00 and $125.50 to $125.99 becomes $126.00.

New Measure

Average Patient Days Per Bed is a new measure in this year's report. It is defined as the average number of days that each hospital bed was occupied in a year. This measure can also be used to determine the average number of days per year that each hospital bed was empty by subtracting the Average Patient Days Per Bed from 365.

New Features

20/20 Reports illustrate the 20 highest and 20 lowest ranked Metropolitan Statistical Areas (MSAs) for each of the following measures:

- Average Charge Per Patient Day
- Average Length of Stay
- Average Charge Per Stay
- Average Patient Days Per Bed

This year, for greater clarity, the 20/20 reports are presented in the form of bar graphs.

Some MSA names are abbreviated. Please refer to the comprehensive MSA listing at the back of this report for the complete MSA name.

A State Rank table now follows each 20/20 Report for the same measures. These tables show all 50 states plus the District of Columbia and include:

- State data reported in 1987
- 1987 State Rank
- 1986 State Rank

The states are shown from the highest cost or number of days to the lowest.

Last, all of the data reported by each state have been aggregated in two categories for a special "MSA Counties and Non-MSA Counties Comparison Report."

Caution: Comparing hospital service charges from one part of the country to another may be misleading, since some regional variations in the charging base may exist. This study makes no attempt to judge the cost-effectiveness or quality of care of any hospital, or of hospital care in any MSA or state.

Survey Highlights

1. **Average Room and Board Charges** increased noticeably across the country with an increase of 9% nationally over last year's charges.

   - 44 states showed an increase in Average Room and Board Charges and in the majority of these (34) average increases were almost 15%.

   - Only 4 states decreased and 3 states showed no change from last year.

2. **Average Ancillary Charges** increased substantially throughout the country. Nationally, the increase was 20% over last year's charges—more than double the increase in Average Room and Board Charges!

   - 45 states showed an increase in Average Ancillary Charges. In 7 of these states, ancillary charges increased by between 32% and 66%!

   - Average Ancillary Charges decreased in only 4 states and remained unchanged in 2 states.

3. Overall, the **Average Charge Per Patient Day** increased significantly throughout the country. The national increase was 16% over last year.

   - 46 states showed an increase in the Average Charge Per Patient Day and 17 of these states had average increases of 20% or greater.

   - Only 4 states had a decrease in Average Charges Per Patient Day and 1 state was unchanged since last year.

4. The large increase in **Average Charge Per Patient Day** is mainly a result of the increase noted above in Average Ancillary Charges.

5. **Average Length of Stay** was quite stable across the country. On average, there was an increase of only 2% for the entire United States when compared to last year.

   - While 26 states showed an increase in Average Length of Stay, only 5 had average increases of 10% or greater.

   - Length of Stay decreased in 20 states, but only 3 of these states had average decreases of 10% or more.

   - 5 states reported no changes in the Average Length of Stay.

6. **Average Charge Per Stay** increased significantly in a majority of states. The national average increase over last year was 19%.

   - Increases were recorded in 41 states and more than half (21) had average increases of at least 20%.
   - Only 9 states had a decrease in Average Charge Per Stay and only 1 state remained unchanged.

7. **The Average Patient Days Per Bed** data reveals that, on average, hospital beds in 35 states were empty at least 150 days a year. And in 13 states, the typical hospital bed was empty as often as it was occupied!

8. A trend was observed among hospitals located in metropolitan areas toward higher charges and longer stays. Beds in these hospitals tended to be occupied more often than their Non-MSA counterparts.

9. On a state-by-state basis, MSA hospitals were almost uniformly found to be higher than Non-MSA hospitals on:

   - Average Room and Board Charges
   - Average Ancillary Charges
   - Average Charge Per Patient Day
   - Average Charge Per Stay
   - Average Patient Days Per Bed

   Virtually all MSA hospitals also had longer Average Lengths of Stay than Non-MSA hospitals.

Participation Rate Report

This report shows the percentage of hospitals in each state that participated in the survey.

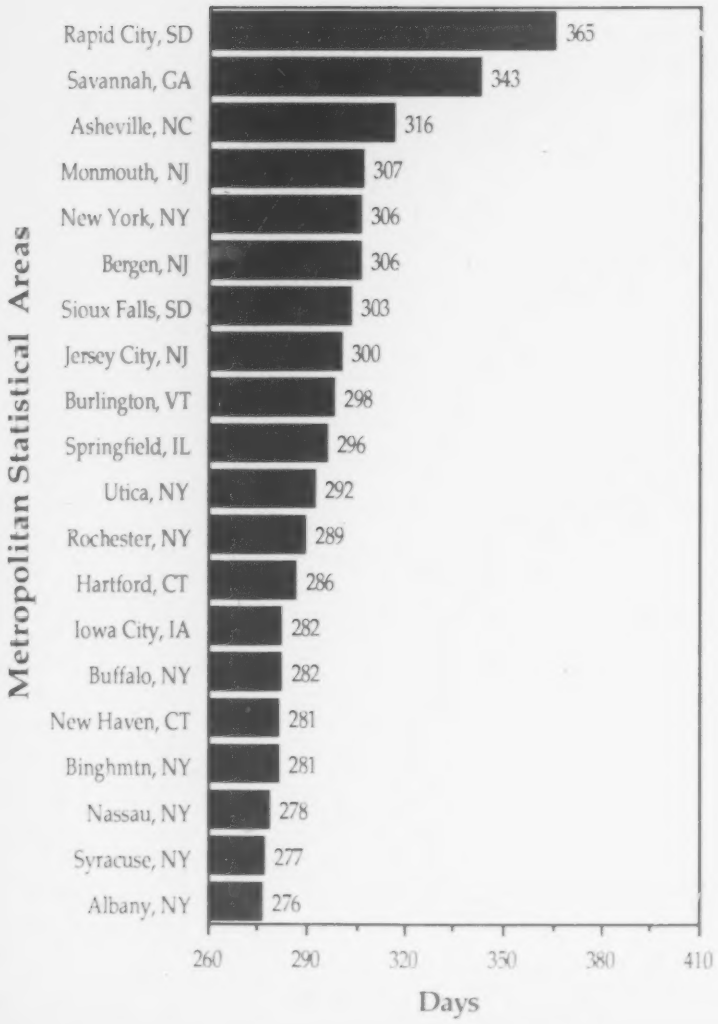
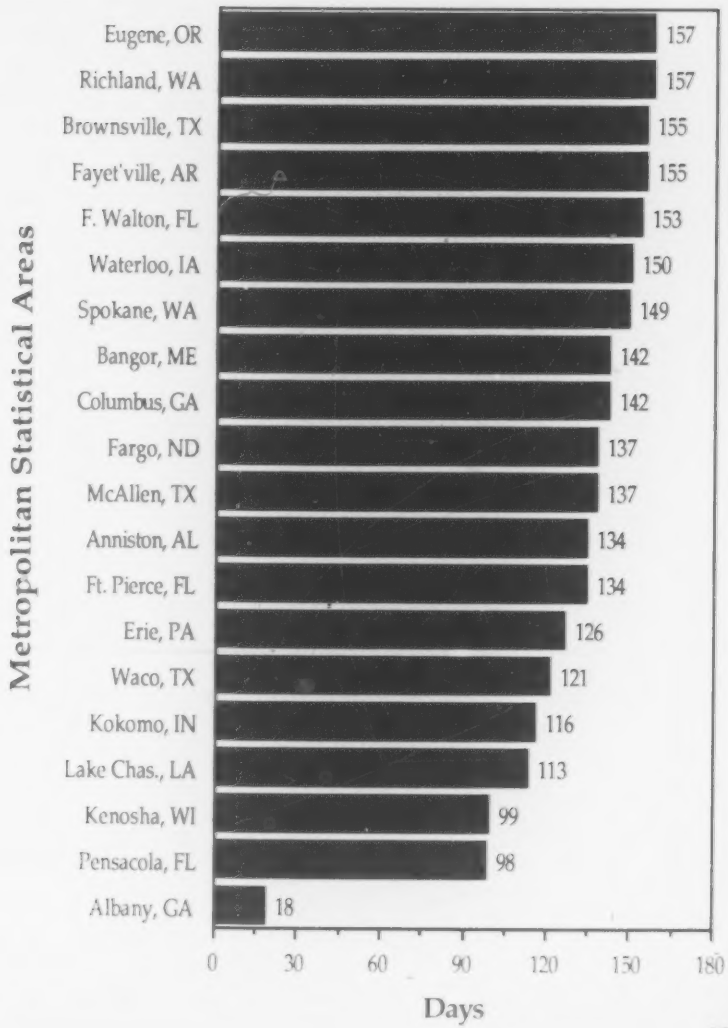
20/20 REPORT: Average Patient Days per Bed

Twenty Highest

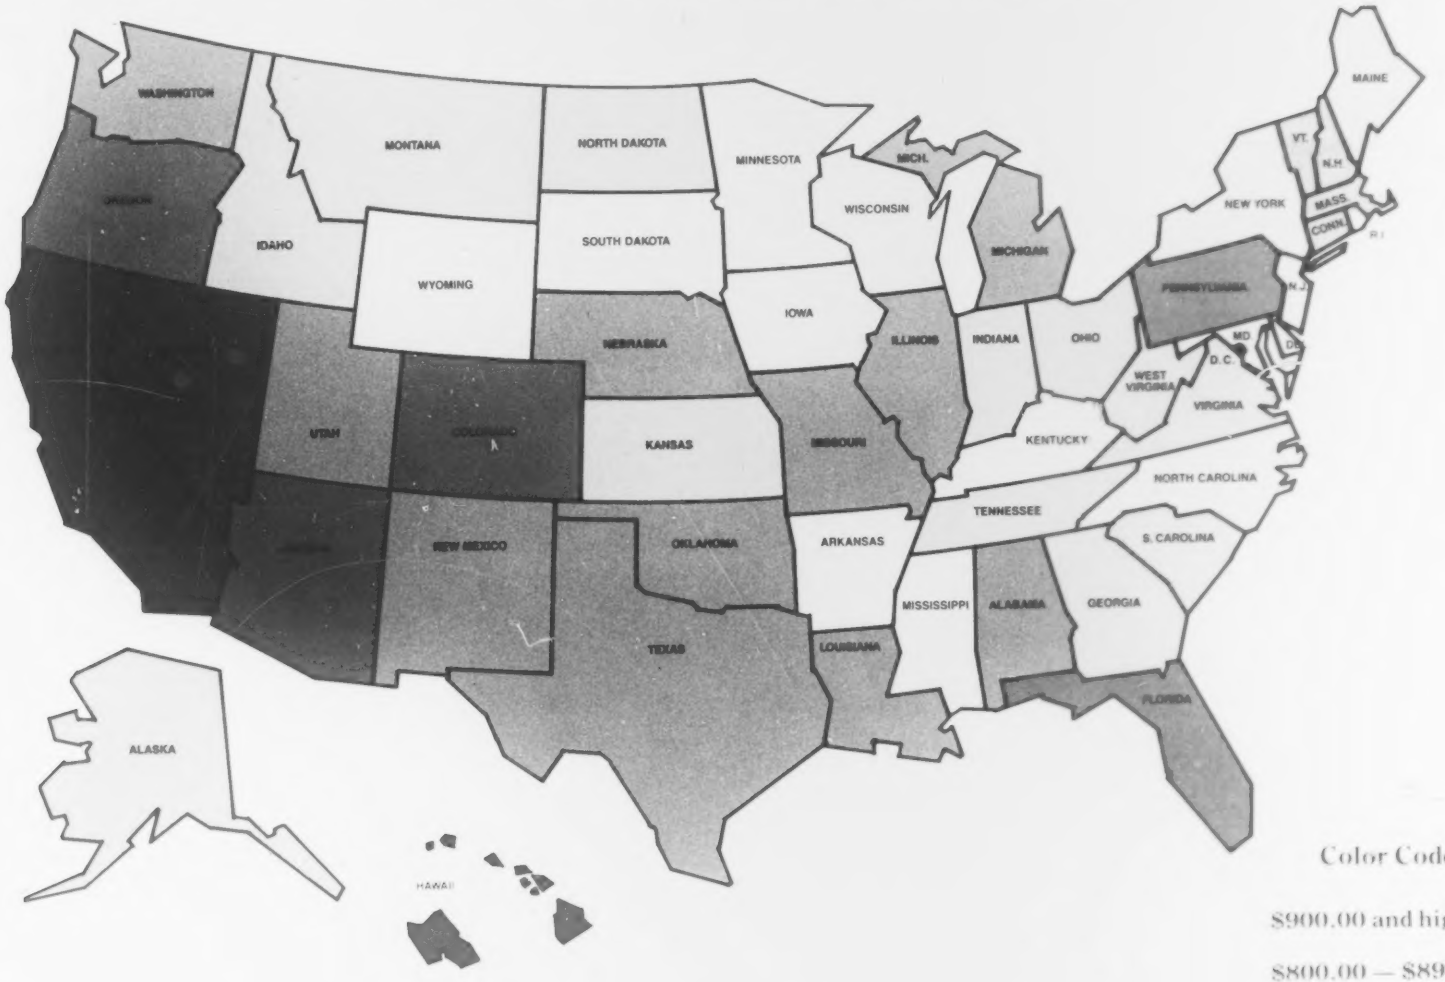


Twenty Lowest



1987 Average Charges Per Patient Day By State

Please refer to the color key to determine in which cost band a state's average hospital charges per day fall.



Color Codes

- $900.00 and higher
- $800.00 — $899.00
- $700.00 — $799.00
- $600.00 — $699.00
- $500.00 — $599.00
- Less than $499.00

Index of Metropolitan Statistical Areas (MSAs) by State and County

An alphabetical listing of all 50 states (plus the District of Columbia) and all the counties within each state that are included in a MSA appear below. The MSA name is shown to the right of each county.

To identify the correct MSA for a particular county:

- First, locate the correct state in the "State" column.
- Next, find the correct county in the "County" column.
- Last, the correct MSA name will appear in the "MSA" column to the right.

Data for county names not shown here appears throughout this report under the "Non-MSA Counties" entry for each state.

Note: For Maryland, Missouri and Virginia only, there are some independent cities appearing in the "County" column. They are designated by the word "city" with a lower case "c".
